TO WHOM IT MAY CONCERN

I have personally known Jeremy for approximately thirty years. Therefore it is with great pleasure that I had an opportunity to be able to give this testimonial in respect of his personal and academic achievements which I am aware of to date.

At the time I first made his acquaintance prior to the early 1980s he was involved with photography which was coincidental with his career at the time in Durban in what is now Kwazulu Natal, RSA.

I came to know him better at the Karate-Do International farm headquarters in the Cape where we underwent final intensive training for the elevation of our Karate training careers at the time to Shodan (First Degree Black Belt status), which was successful for both of us at the time. He has since pursued this martial art in Cape Town as at date.

I hereby freely state that his gemological career has been a successful one and that it is not merely based on only a 'certificates on the wall' status, but is supported not only by numerous years of being self supporting and totally independent, but in-between times gaining considerable additional experience in management of medium and large gems and jewellery organizations. I am personally satisfied he has done a good job for his up-market employers during those relevant periods and have been privy to his successful progress during those time frames.

I was best man at his wedding and that union has produced two, now late teenage, children. His wife, Jenny, has associated jewellery knowledge and is an asset to his career.

I cannot criticize his dedication and outright honesty to his personal outlook as well as to his peers and clients he has dealt with over the years. He also maintains a well ordered life and is very methodical in what he does.

I respect him for the person he is. My wish is for his continued success and I can equivocally recommend him to any organization in the gem industry who may wish to employ him.

Given in good faith by & forwarded per e-mail to Jeremy.
